CERTIFICATE OF GLOBAL RECOGNITION

PRESENTED TO

BUYUNG ARIANTO

GENERAL MANAGER
PT PLN INDONESIA POWER UNIT BISNIS PEMBANGKITAN (UBP) PRIOK

ACKNOWLEDGED AS

OPERATIONAL ESG IMPACT LEADER

BASIS FOR LEADERSHIP RECOGNITION

Before: Coastal communities surrounding UBP Priok faced interconnected environmental and socio-economic challenges, including waste accumulation, declining environmental quality, limited productive opportunities, and household income vulnerability. These conditions threatened community resilience while creating environmental, social, and reputational risks within the company's operating environment.

Transformations: Under the managerial leadership of Buyung Arianto, PESONA BETAWI (Penguatan Komoditas Lokal untuk Ketahanan Pangan dan Lingkungan Berkelanjutan di Wilayah Pesisir) integrates local commodity development, circular economy practices, productive waste utilization, community enterprise empowerment, and institutional capacity building. Through collaborative partnerships and knowledge transfer, the program has contributed to reducing approximately 5.67 tons of waste annually, developing seven community enterprise groups, and increasing beneficiary household income by approximately 20% on average.

Significance: Meaningful operational ESG leadership transforms environmental and social vulnerabilities into opportunities for lasting community resilience and economic protection. PESONA BETAWI demonstrates how strengthening local livelihoods, productive capabilities, and environmental stewardship can create shared value for coastal communities while supporting the sustainability of the company's operating environment.

RECOGNITION LEVEL

PLATINUM LEADER PERFORMANCE 94.50

THIS CERTIFICATE, ACCOMPANIED BY TWO APPENDICES, IS HEREBY ISSUED IN JAKARTA ON OCTOBER 21, 2026

ASSESSMENT OF OPERATIONAL ESG IMPACT LEADER IN INDONESIA 2026

THE ASSESSED INDIVIDUAL

BUYUNG ARIANTO
GENERAL MANAGER UNIT BISNIS PEMBANGKITAN PRIOK
PT PLN INDONESIA POWER UBP PRIOK

FOLLOWING AN ASSESSMENT CONDUCTED USING THE LA TOFI ESG RATING ASSESSMENT FRAMEWORK, THIS PROGRAM HAS BEEN AWARDED

PLATINUM GLOBAL PERFORMANCE

ASSESSMENT PILLAR	SCORE	WEIGHT	WEIGHTED SCORE
LRMI (Local Risk Mapping Index)	100.0	**15%**	**15.00**
RSAI (Risk–Strategy Alignment Index)	100.0	**15%**	**15.00**
AMS (Action Mitigation Score)	93.0	**15%**	**13.95**
FVS (Field Verification Score)	92.0	**15%**	**13.80**
HWR (Humanitarian Workforce Readiness)	91.0	**15%**	**13.65**
HCR (Humanitarian Crisis Response)	90.0	**10%**	**90.00**
EPC (Economic Protection Contribution)	94.0	**15%**	**14.10**
TOTAL		**100%**	**94.50**

- **LRMI (100)** → The maximum LRMI score reflects Buyung Arianto's strong ability to understand material local risks as the foundation for program management. Through PESONA BETAWI, environmental degradation caused by waste, livelihood and income vulnerability, limited productive access for vulnerable groups, declining coastal ecosystem quality, and reputational and Social License to Operate risks are identified as material issues relevant to UBP Priok's operating environment.
- **RSAI (100)** → The maximum RSAI score demonstrates a very strong alignment between identified risks and program strategies. PESONA BETAWI connects circular economy initiatives, productive waste utilization, livelihood diversification, vulnerable-group empowerment, institutional strengthening, technical training, business mentoring, knowledge transfer, and stakeholder collaboration within an integrated risk-mitigation strategy.
- **AMS (93)** → The AMS score reflects a very high level of program execution and mitigation capability. PESONA BETAWI has generated measurable outcomes, including approximately 5.67 tons of waste reduction per year, the development of seven community enterprise groups, and an average increase of approximately 20% in beneficiary household income, supported by technology and capacity development. The score is not placed at the maximum level because several outcomes remain collective organizational achievements, while longer-term ecological outcomes and direct Social License to Operate impacts require stronger measurement.
- **FVS (92)** → The FVS score indicates a very strong level of evidence supporting program implementation and impact. Evidence includes quantitative data, community group structures and legal status, group funds, knowledge-transfer activities, partnerships, and SROI measurement. Further improvement would require stronger independent verification, ecological baseline–endline measurement, and more specific evidence isolating Buyung Arianto's individual contribution to particular long-term program outcomes.

- **HWR (91)** → The HWR score reflects strong organizational readiness in relation to human safety, protection, and resilience. Buyung Arianto's professional background across power generation operations, maintenance, engineering, asset management, occupational health and safety, risk management, and O&M provides a strong managerial foundation for organizational preparedness. His leadership environment also demonstrates attention to safety and community resilience. The score is not placed at a higher level because available evidence of his direct leadership in large-scale humanitarian or disaster response remains limited.
- **HCR (90)** → The HCR score reflects a strong capacity for stakeholder communication, coordination, and influence. As General Manager, Buyung Arianto leads an organization that requires continuous cross-functional coordination and engagement with internal and external stakeholders. PESONA BETAWI further demonstrates active community engagement through FGD processes, monitoring and evaluation, participatory decision-making, and multi-stakeholder collaboration. This provides a reasonable basis for assessing his communication and influencing capability at a high level. However, the score is not placed higher because the available evidence does not yet demonstrate substantial direct leadership by Buyung Arianto in crisis communication during a major operational, environmental, social, or reputational incident.
- **EPC (94)** → The EPC score demonstrates a very strong contribution to the protection of corporate economic value through ESG-based program management. PESONA BETAWI has been assessed with a Corporate Economic Protection Index (CEPI) of 2.74, with an estimated Economic Protection Value of approximately IDR 2.08 billion against a program investment of approximately IDR 760.14 million. This indicates that every IDR 1 invested in the program is associated with approximately IDR 2.74 of economic value protected from relevant material risk exposure. Buyung Arianto's professional background in engineering, power generation operations, maintenance, asset management, risk management, and O&M strengthens the relevance of his managerial contribution to economic protection. Nevertheless, the economic protection value generated by PESONA BETAWI remains a collective program and organizational achievement and should not be attributed entirely to one individual.

With a final score of 94.50, Buyung Arianto demonstrates exceptional alignment across risk identification, strategy, mitigation, impact verification, organizational readiness, stakeholder communication, and economic protection. His extensive experience in engineering, maintenance, asset management, power generation, risk management, and O&M enables him to connect operational leadership with ESG-based risk management. Through PESONA BETAWI, environmental and socio-economic risks are transformed into integrated actions involving circular economy, community empowerment, knowledge transfer, institutional strengthening, and stakeholder collaboration. The measurable impacts remain collective organizational achievements under his managerial leadership, rather than outcomes attributable solely to him. His HWR and HCR scores are therefore assessed cautiously, reflecting strong organizational readiness and communication capacity while recognizing limited evidence of direct leadership in major humanitarian or crisis situations. Based on the La Tofi ESG Leadership Assessment Framework, Buyung Arianto achieves PLATINUM LEADER PERFORMANCE with a final score of 94.50, reflecting his strong capacity to translate ESG risks into strategy, measurable impact, stakeholder resilience, and economic protection.
