CERTIFICATE OF GLOBAL RECOGNITION

PRESENTED TO

DEKARIUS WIYAN FYSINGZA

GENERAL AFFAIRS & EXTERNAL RELATIONS DEPARTMENT MANAGER
PT KALTIM METHANOL INDUSTRI

ACKNOWLEDGED AS

ESG IMPACT MANAGER

BASIS FOR LEADERSHIP RECOGNITION

Before: For the fishermen of Selambai, declining catches, rising operating costs, inadequate fish preservation, and coastal pollution created persistent threats to livelihoods, environmental sustainability, and community resilience. These interconnected risks called for an approach that could connect industrial capabilities with the needs of coastal communities.

Transformations: Through the Modernisasi Kampung Nelayan Selambai program, supported by Dekarius Wiyan Fysingza's managerial responsibilities in external relations and stakeholder engagement, PT Kaltim Methanol Industri transforms surplus industrial resources into innovative fish-preservation technology. Combined with coastal waste management and community empowerment, these interventions help strengthen fishermen's economic resilience and environmental responsibility.

Significance: Meaningful ESG leadership connects industrial expertise with human needs. By supporting collaboration between corporate resources and coastal communities, the program demonstrates how innovation and responsible management can reduce vulnerability, strengthen livelihoods, and transform sustainability initiatives into mechanisms for protecting shared economic and environmental value.

RECOGNITION LEVEL

PLATINUM LEADER PERFORMANCE 94.05

THIS CERTIFICATE, ACCOMPANIED BY TWO APPENDICES, IS HEREBY ISSUED IN JAKARTA ON OCTOBER 21, 2026

CATEGORY: SCORE 85 - 100 — PLATINUM LEADER PERFORMANCE, SCORE 70 - 84 — GOLD LEADER PERFORMANCE, SCORE 55 - 69 — SILVER LEADER PERFORMANCE, SCORE 0 - 54 — BRONZE LEADER PERFORMANCE.

ASSESSMENT OF OPERATIONAL ESG IMPACT LEADER IN INDONESIA 2026

THE ASSESSED INDIVIDUAL

DEKARIUS WIYAN FYSINGZA
GENERAL AFFAIRS & EXTERNAL RELATIONS DEPARTMENT MANAGER
PT KALTIM METHANOL INDUSTRI

FOLLOWING AN ASSESSMENT CONDUCTED USING THE LA TOFI ESG RATING ASSESSMENT FRAMEWORK, THIS PROGRAM HAS BEEN AWARDED

PLATINUM GLOBAL PERFORMANCE

ASSESSMENT PILLAR	SCORE	WEIGHT	WEIGHTED SCORE
LRMI (Local Risk Mapping Index)	100.0	**15%**	**15.00**
RSAI (Risk–Strategy Alignment Index)	100.0	**15%**	**15.00**
AMS (Action Mitigation Score)	92.0	**15%**	**13.80**
FVS (Field Verification Score)	92.0	**15%**	**13.80**
HWR (Humanitarian Workforce Readiness)	90.0	**15%**	**13.50**
HCR (Humanitarian Crisis Response)	90.0	**10%**	**9.00**
EPC (Economic Protection Contribution)	93.0	**15%**	**13.95**
TOTAL		**100%**	**94.05**

- **LRMI (100)** → The maximum LRMI score reflects Dekarius Wiyan Fysingza's strong professional foundation in industrial risk management, operational safety, and environmental protection. With more than 15 years of experience at PT Kaltim Methanol Industri, including responsibilities in HSE, industrial operations, and external relations, he possesses relevant competencies for understanding material environmental, social, and governance risks. The Modernisasi Kampung Nelayan Selambai program addresses five significant risks involving coastal ecosystem degradation, plastic and styrofoam pollution, fishermen's livelihood instability, high fishing operating costs, and corporate reputation. His technical background in HAZOP, HAZID, and environmental risk management supports the assessment of his risk-awareness capability.
- **RSAI (100)** → The maximum RSAI score reflects the strong alignment between identified coastal risks and the program's strategic interventions. Modernisasi Kampung Nelayan Selambai connects industrial resource innovation with practical solutions for traditional fishermen, coastal environmental management, and community economic resilience. Dekarius's managerial responsibilities in General Affairs and External Relations provide a relevant foundation for coordinating corporate resources, internal functions, and external stakeholders. This alignment demonstrates how industrial capabilities can support sustainability strategies addressing material risks beyond the company's operational boundaries.
- **AMS (92)** → The AMS score reflects a very high level of mitigation performance demonstrated by the program's integrated interventions. Innovative cooling technology, including Coldbox and Kotak Kehidupan, supports improved fish preservation and reduced operating costs, while coastal cleanups, waste management, and community empowerment address environmental and social vulnerabilities. The program reports fish-preservation capability of up to 72 hours and improvements in fishermen's operating efficiency. These achievements provide a strong foundation for evaluating the effectiveness of the initiatives associated with Dekarius's managerial responsibilities. The score remains below the maximum because several outcomes represent collective organizational achievements and require further evidence of individual attribution and long-term sustainability.
- **FVS (92)** → The FVS score reflects substantial supporting documentation concerning Dekarius's professional competence, managerial experience, and the reported achievements of Modernisasi Kampung Nelayan Selambai. His professional credentials include engineering education, industrial safety qualifications, HAZOP and HAZID training, and leadership development. Program documentation also provides evidence of environmental interventions, community participation, and reported economic improvements. Further verification should focus on independently confirming fishermen's economic benefits, the sustainability of environmental outcomes, and Dekarius's specific leadership contribution to program decisions and measurable results.

- **HWR (90)** → The HWR score reflects Dekarius's strong technical foundation in occupational safety, industrial hazard identification, and emergency preparedness. His professional background includes HSE responsibilities, HAZOP and HAZID competencies, and certification as an occupational safety specialist in fire prevention and response. These qualifications demonstrate a high level of professional readiness to recognize safety hazards, support preventive measures, and understand emergency management requirements within an industrial environment. The assessment also recognizes the relevance of these competencies to broader humanitarian risk awareness. However, the available evidence does not yet establish substantial direct leadership in community-level disaster response or humanitarian emergency operations.
- **HCR (90)** → The HCR score reflects strong organizational communication, stakeholder coordination, and managerial influence associated with Dekarius's responsibilities as General Affairs & External Relations Department Manager. His role requires engagement with internal departments, external institutions, and surrounding communities. This capacity is supported by documented initiatives to strengthen corporate public relations and CSR communication competencies, including collaboration with professional journalism organizations. These activities demonstrate the importance of communication in maintaining stakeholder relationships and supporting program implementation. The score recognizes his established communication and coordination responsibilities. However, no additional assessment credit is attributed to direct crisis communication leadership, as specific evidence of such involvement has not yet been established.
- **EPC (93)** → The EPC score reflects a strong association between Dekarius's managerial responsibilities and the economic protection objectives of Modernisasi Kampung Nelayan Selambai. The program has been assessed with a modeled Corporate Economic Protection Index (CEPI) of 2.82, based on an investment of IDR 395,000,000 and an estimated Economic Protection Value of IDR 1,113,843,600. This indicates that every IDR 1 invested in the program is associated with approximately IDR 2.82 of modeled economic protection value within its relevant scope of influence. Through innovative fish-preservation technology, improved resource efficiency, coastal waste management, and community empowerment, the program demonstrates how industrial resources can contribute to protecting livelihoods and reducing material ESG risks. Dekarius's professional experience in industrial operations, risk management, and external relations strengthens the relevance of his managerial contribution. Nevertheless, the estimated economic protection value remains a collective program-level outcome and should not be attributed exclusively to one individual.

With an overall score of 94.05, Dekarius Wiyan Fysingza demonstrates exceptional ESG leadership by integrating industrial expertise, risk management, stakeholder engagement, and community empowerment. Through Modernisasi Kampung Nelayan Selambai, industrial innovation strengthens fishermen's livelihoods and coastal resilience. The program's modeled CEPI of 2.82 reinforces its economic protection potential, supporting his recognition under Platinum Leader Performance, subject to final verification.
